

Flamingo Kiss Spinner

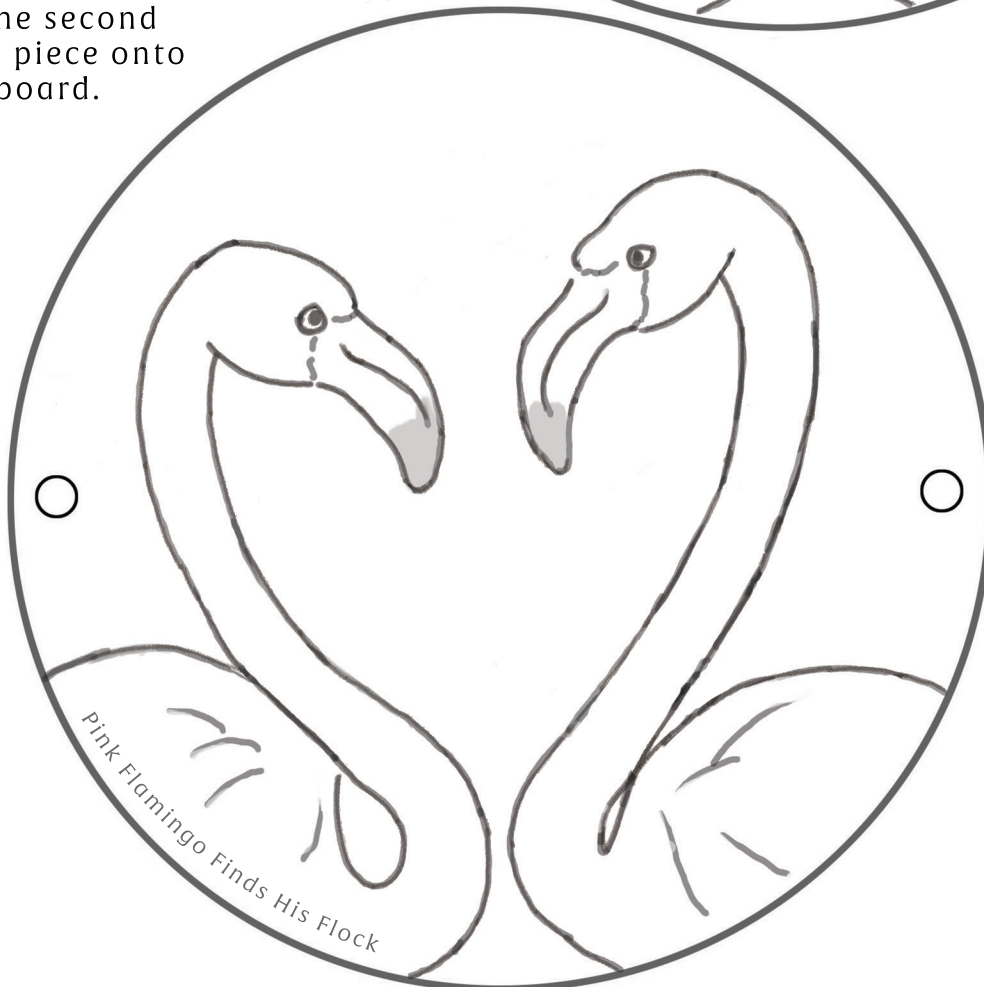

(These spinners work best if printed on cardstock.)

- 1 Color flamingos with crayons or colored pencils.
- 2 Cut out both pieces.
- 3 Trace and cut out a third circle the same size from thin cardboard, such as an empty cereal box.
- 4 Glue one piece onto the thin cardboard circle.
- 5 Carefully poke holes through the small circles to the left and right of the flamingos.
- 6 Now poke holes through the small circles on the other piece.
- 7 Line up the holes. Make sure the cardstock circles both show the flamingo heads pointing away from you.
- 8 Glue the second flamingo piece onto the cardboard.

Pink Flamingo Finds His Flock

by Rachel Armington

- 9 Tie a short string through each small hole.
 - 10 Hold a string end in each hand. Wind the spinner by swinging it around several times.
 - 11 Gently pull each string to see the flamingos move.
- TIP: If the spinner is too light to wind easily, tie beads or buttons close to the small holes on each side.
